

Kajsa Granström

Lunar lander game

Idea:

A package with a parachute will fall from the sky and land in Santa's bag. You lose if the package lands too fast in the bag or if you land it outside of Santa's bag.

If there is time left maybe make the package go flat if it lands with too much velocity or outside of Santa's bag.

Different states:

Start Screen with instructions and start game button. The game will be controlled with the arrow buttons.
